**The natural choice for every building project.** For more than a century, Sphinx sanitary fittings have been installed in houses, offices, hotels, restaurants, hospitals, sports complexes, stations and schools. This is not a coincidence, but the natural evidence of exceptional quality and extraordinary durability. This is what makes Sphinx a leading supplier for every conceivable project or private bathroom. The Sphinx 280 new project series makes bathroom planning easier, with a compact but comprehensive product range, where quality and affordability go hand in hand. The Sphinx 280 new series shows that simple design can be effectively functional.

Quality, easy installation and durability are the keywords of the Sphinx 280 new series. This series of functional products guarantees many years of carefree usage. With a concise, but comprehensive product range, this series is eminently suitable for a variety of applications.

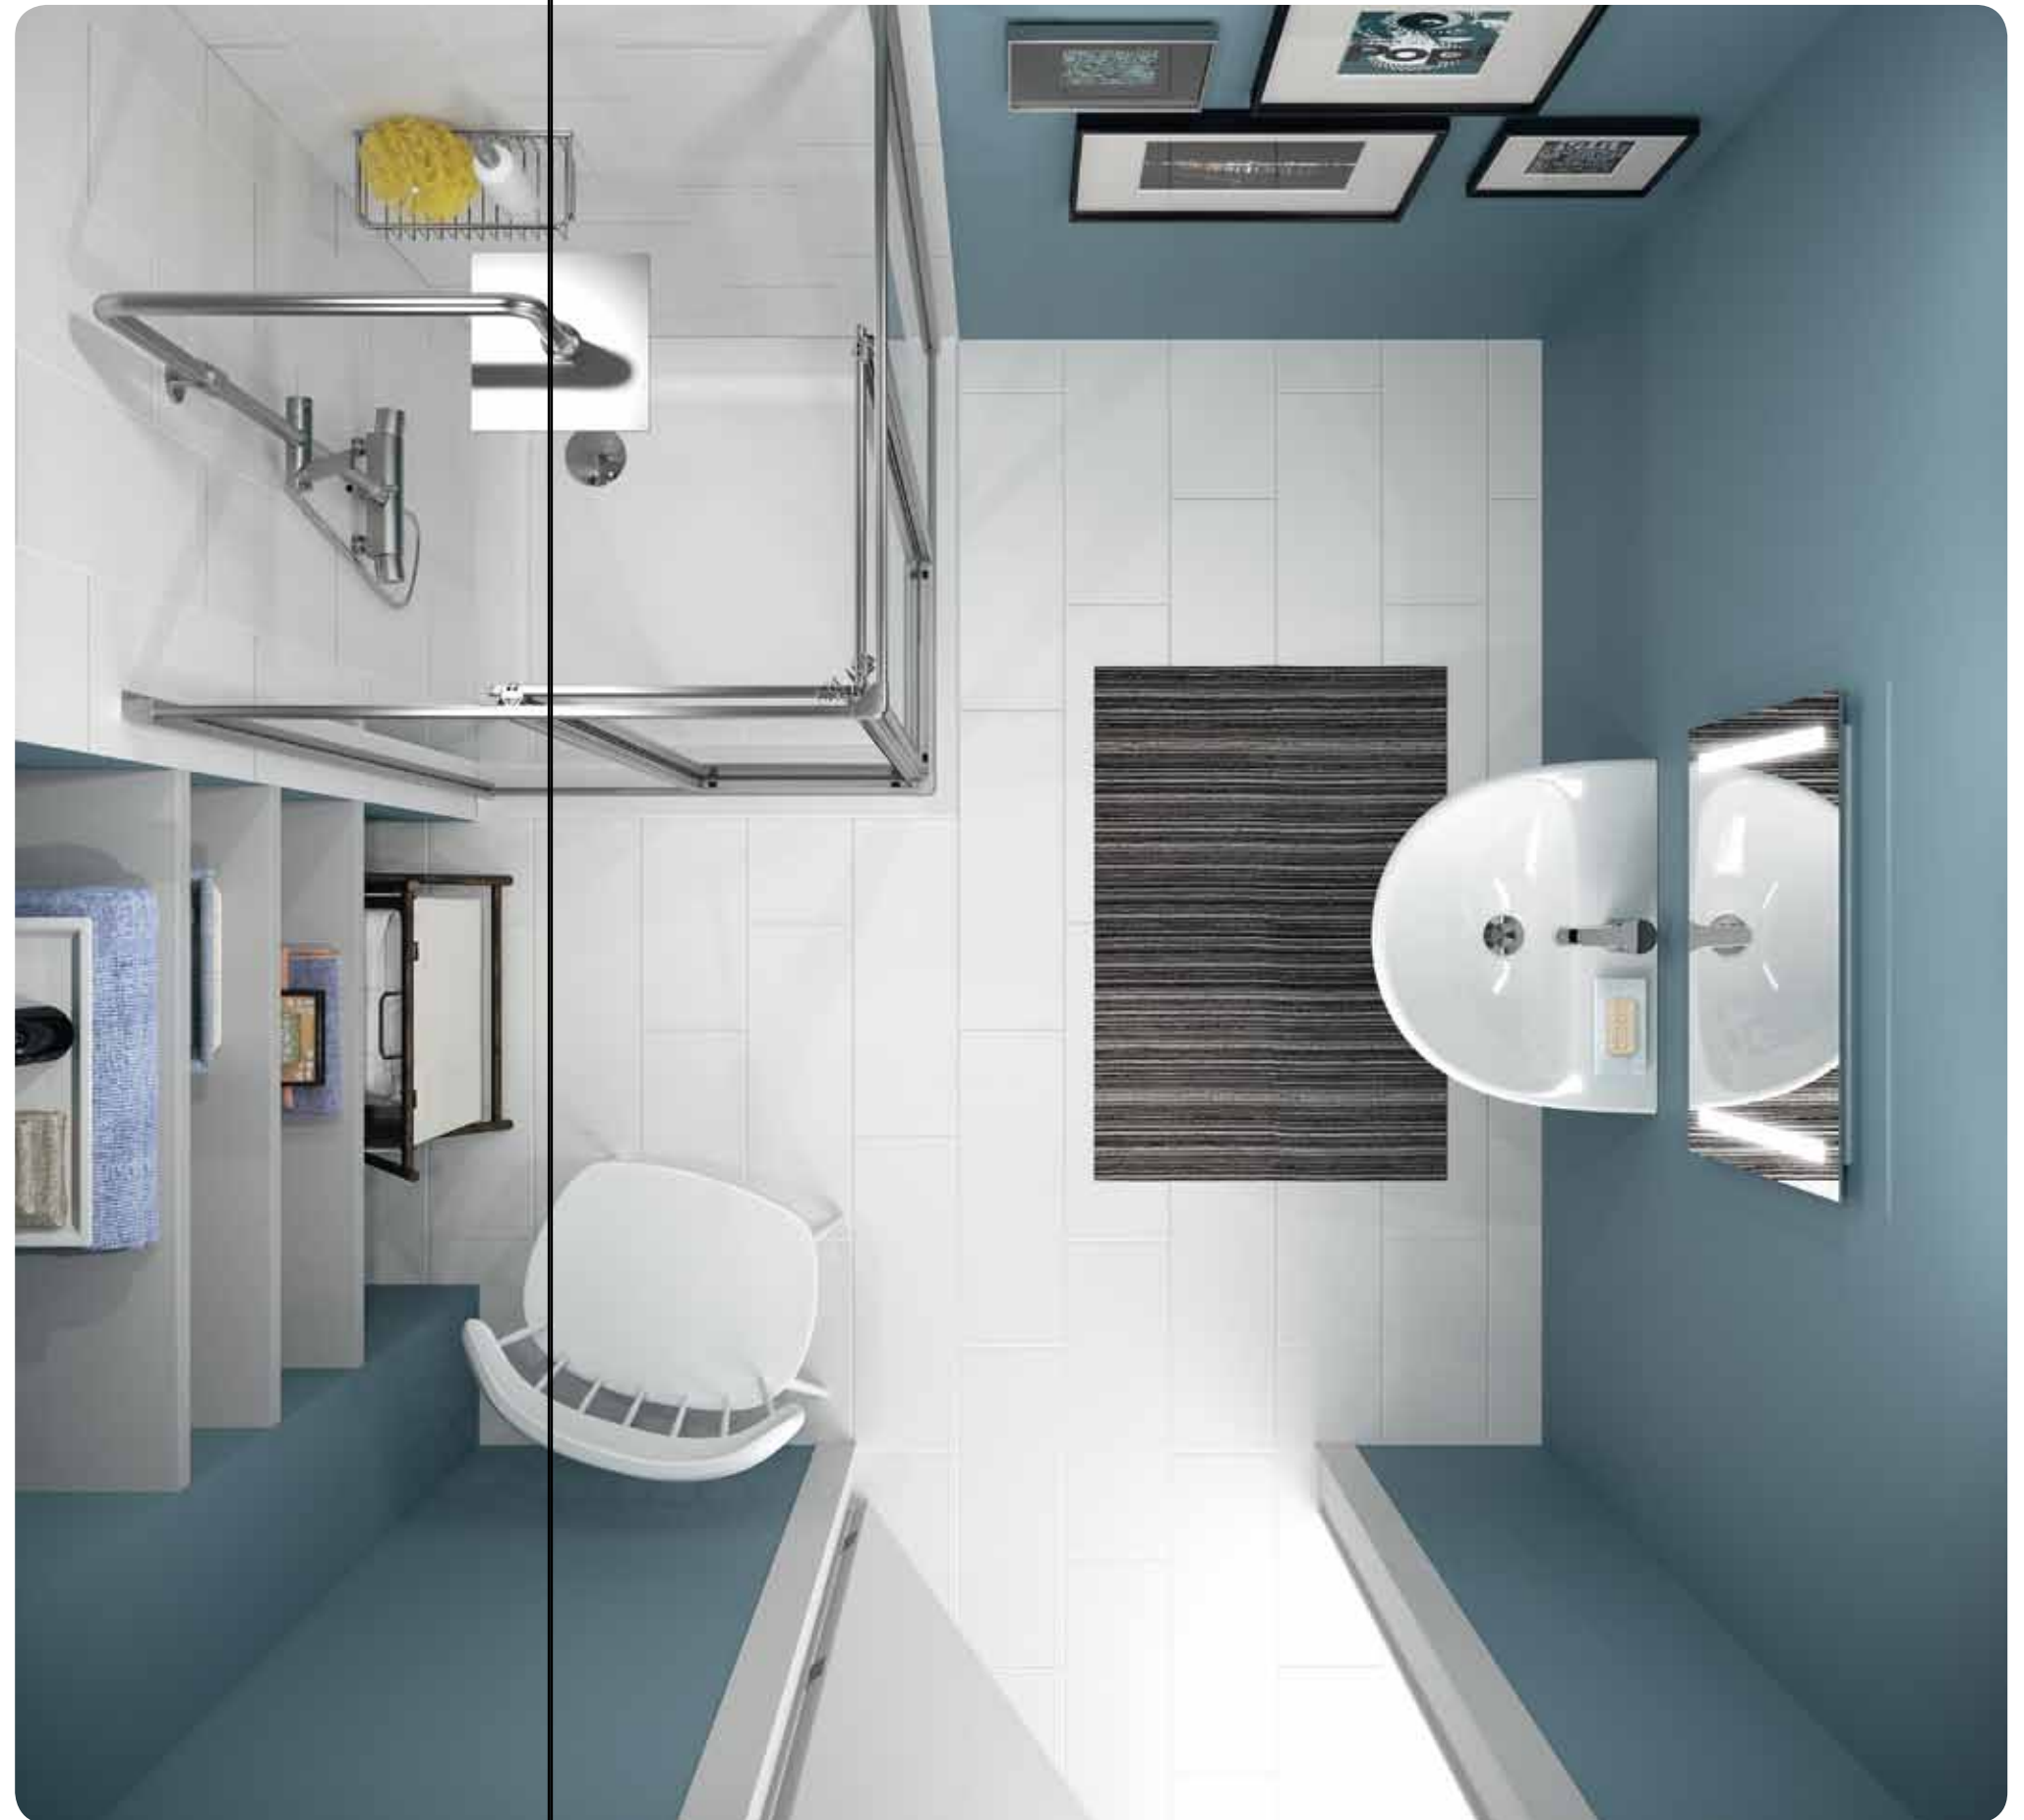

The Sphinx 280 new series is characterised by the rounded design of its washbasins, a theme that is reflected in the WC and seat.

Washbasin sizes of 50, 55, and 60 cm make the series perfect for designing today's functional bathrooms - whether in small apartments, family homes or public buildings.

The Sphinx 280 new series also offers a range of possibilities for toilets. Floor-standing WCs, a wall-hung WC, closet combinations with ceramic cisterns, perfectly matched by the 36 cm hand basin, which fits in even the smallest toilet

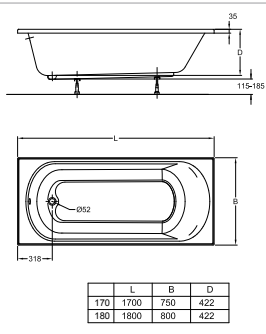

The ergonomic design of the Sphinx 280 new Comfort washbasin provides great ease of use for persons with limited mobility. The washbasin is available in two sizes - 55 cm and 65 cm - suitable for both small and large rooms. The smart application of the washbasin with built-in siphon creates additional moving space for wheelchair users
